

Grading Criteria for Assignment 3

Total: 100 points + bonus

Any code that crashes on CLIC will receive 0.

Experiments and Documentation: 80 points

-Comparison of classifiers: 20 points

-Feature extracting methods:

a	b	c	d
10	10	20	10

Note: Your experiment report should include the statistics (precision, recall, etc.) you got from each method, the observations and conclusions (explanations) you obtained.

-Conclusions you draw from this homework, other interesting observations: 10 points

Precision: 20 points

Running time:

If your code cannot finish predictions for all the 3 language in 30 minutes, you will get 0.

Precision:

The full scores for the 3 languages are:

English	Spanish	Catalan
7	7	6

If your code cannot beat the baseline for a language, you will receive 0 for that language. Otherwise you will get 50% of the score for that language.

For the remaining 50% of the score, we will rank the precisions of all the students' submissions.

And the scores will be given based on your rank:

Rank	Percentage of 50% Points
20%	100%
21%-40%	80%
41%-60%	60%
61%-80%	40%
81%-100%	20%

For top 10 in each language we will give 10~1 bonus. If you got bonus in several languages, you will only receive the highest one.

Late day policy

10% off for each late day. After three days, the assignment will be given a score of 0.
